Hello...

     The news link to my system hasn't been working properly this week. I saw
from another system that somebody responded to my 9600 and Mitrek post with
an offer to E-mail them, and they would tell me how easy the mods were.

Un fortunately, I don't have his/her E-mail address and the news system dunped
all of the posts. Please E-mail mail if you were this individule as news on
this end of the line isn't doing the job. THANKS!

Yes. I use it on a PC. It's really useful.

I have a pair of genuine MaCOM Gunnplexers, with the 17 dBi horns,
that I will likely never use. It's one of those projects that I got
really hot on for a while, but just don't seem to have the time to
wrap up. *sigh*

I would be interested in swapping them for a pair of plug-n-play 9600
bd 70cm radios, or similar value.

     Scott -- (415) 965-4160
